

Snow Plowing Update

Since Friday evening, plowing crews have been working tirelessly to plow neighborhoods roads, as well as re-plowing some primary roads recovered by wind drifts. They will not stop until all roads are cleared.

The snow is a **heavy** and **wet snow**, which **takes much longer (in most cases as much as double the normal expected time) to plow.**

Please remember that our plowing crews, some on their second or third shifts over the past few days, are working to plow our neighborhood roads **as fast as possible given the severe conditions (nearly 2 feet of snow)**, while ensuring safety.

We ask residents to remain patient throughout the day as our dedicated crews work to clear our neighborhood roads. Keep parked cars in your driveway or on your property if possible. While crews try to minimize driveway blockage, the large amount of snow may result in a higher plough pile than usual. Wait to clear your driveway apron until after your road has been plowed; and do not shovel snow back into the street.

Remain off the roads if you do not need to travel. In the event of an emergency, call 911.
